Allen and Greenough's New Latin Grammar for Schools and Colleges, founded on comparative grammar. Edited by J. B. Greenough, G. L. Kittredge, A. A. H. Howard, Benj. L. D. Ooge. Boston, Ginn & Co., 1903.

The Allen and Greenough's New Latin Grammar, recently published, will take its place in the foremost ranks of Latin grammars as a suitable text-book for secondary schools and the college student. Advantage has been taken of the careful study, investigation and practical conclusions reached since the edition of 1888, and the result is an excellent guide for the student of Latin. That which recommends the book more than any other feature is the clear and complete setting forth of the fundamental principles of Latin syntax, both noun and verb constructions. While the citations of examples are from a wide range of authors, yet they are unusually clear and arranged in such a way as to invite the attention of the beginning student. The terminology employed is plain and satisfactory and the typography is neat and attractive, and with the beginner these features are important.
